

TITAN PREMIER™

MADE IN USA

Model "J"™ Stuffing Boxes

Wellhead Systems Inc. continues to develop effective and efficient product solutions to support the evolving dynamics in the oil and gas industry with the Titan Premier™ product line. The new Model J stuffing box combines key features of past boxes and new design ideas for today's higher pressures and compact profile needs. By designing pressure balanced ram technology into the Model J box, customers now have a stuffing box and genuine bop combination in one unit.

Specifications:

- 3000 PSI (2", 2 ½", 3")
- Meets NACE MR-01-75
- 1-1/4", 1-1/2" & 1-3/4" polish rod sizes
- Integral bop with pressure balanced rams
- Integral flapper valve assembly (NOT available with 1-3/4" polished rod size)
- **Interchangeable bottom base**
- **Body and base Enduro bond coated**
- ¼" port for bleed valve or pressure gauge
- Available in BTM flange connection
- BS-ELUG & ECSS shut down system available
- Spanner wrench available for lug cap

**3000 PSI
MODEL "J"**

"Customer Corner"

- Tired of adjusting and replacing bolts? A single threaded cap distributes even packing compression and adjustment
- HSN Super Dome™ packing in primary chamber provides a pressurized seal and increased wear life
- Simplicity of design and unique engagement of packing, reduces packing replacement costs and time. Recommended to use with polished rod lubricator.
- Protection of packing when stacking out rod string. Max. 40,000 lbs. stack out weight.
- Unitized stuffing box & bop provides lower stack height & lighter weight
- Fewer connections, less leak paths
- When combined with 300T or 500T BOP, customer has dual ram protection
