

Remote Rod Rotator Greaser **Pumpers Friend™**

**SAFETY
ALERT**

The NEW “Pumpers Friend”™ is designed for safety and efficiency. The pumper can now remotely grease the rod rotator without the need of a harness, lift truck or shutting down production. The Pumpers Friend provides easy access to the grease manifold at ground level. The manifold is positioned on the Samson post of pumping unit and routed to the grease zerks on the rod rotator. This unique design reduces safety risks and increases productivity..

- ***Eliminates the need for service bucket truck and safety harness***
- ***Not necessary to shut unit down to grease increasing productivity***
- ***Decreased maintenance time and cost***
- ***Easy installation***
- ***Available with all models***

“Customer Corner”

- HSE dream, eliminating the need for harness and /or bucket truck
- Reduces maintenance cost of time, down production and need for service trucks
- Pumpers can grease rod rotators in a 1/3 of the time or less, decreasing maintenance cost and increasing production
- Inexpensive product to improve your fall prevention procedures. Potentially eliminating falls associated with greasing rod rotators.
